TEST_LOG — AgriSoko Pocket G03

Verification COMBO-G03-7014. Automated rows are filled from pytest. Device rows are completed on physical phones.

A. AI and API (automated)

Case	Owner	Result
Exact name “Tell me about Mohammed Osama Hasan”	Nuzha	Run pytest tests/test_matching.py::test_exact_name_query
Alias “Who is Moj?”	Nuzha	tests/test_matching.py::test_alias_query
Role “Who is the AI and data engineer?”	Nuzha	tests/test_matching.py::test_role_query
Feature “Who built offline mode and AsyncStorage cache?”	Nuzha	tests/test_matching.py::test_feature_query
No-match weather question	Nuzha	tests/test_matching.py::test_no_match_unrelated
Empty dataset	Nuzha	tests/test_matching.py::test_empty_dataset_returns_no_match
Missing question → 422	Ehab	tests/test_api.py::test_missing_question_rejected
Unknown member → 404	Ehab	tests/test_api.py::test_member_404
Ask schema	Ehab	tests/test_api.py::test_ask_success_schema

Full suite: `cd ai-api && pytest -q`. Summary numbers: `python build_index.py` writes models/evaluation.json.

B. Device matrix (fill on install)

Device or configuration	Android	APK without Expo Go	Online ask	Offline name lookup	Tester	Date
Phone A						
Phone B or emulator (materially different)						

C. Fixes to link after device testing

Issue	Observation	Commit
To be opened	Record two reproducible bugs only after they are seen on a device.
